Professional Summary

Full-Stack Software Developer with hands-on experience building scalable web applications, RESTful APIs, and microservices architectures using .NET Clean Architecture, Node.js, React, Django, and MongoDB. Proficient in Redis-based caching and pub/sub patterns, Docker, and AWS deployments. Additional expertise in cybersecurity—including penetration testing with Ghidra, Burp Suite, and Metasploit—enables a security-first development mindset. Patent-filer, open-source contributor, and technical mentor passionate about delivering production-grade software.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, C#, C++

Web & Frameworks: Node.js, Express.js, React.js, Django, ASP.NET Core (.NET Clean Architecture), REST APIs, Socket.io, HTML5, CSS3, Tailwind CSS, Bootstrap

Microservices & Messaging: Microservices Architecture, .NET Clean Architecture, Redis (Caching, Pub/Sub, Sessions), Docker

Databases: MySQL, MongoDB, SQL Queries, Data Modeling, Database Design

DevOps & Cloud: Git, GitHub, Docker, AWS, Vercel, Linux Administration, Postman

Security & Pentesting: Ghidra (Reverse Engineering), Burp Suite, Nmap, Metasploit, Wireshark, OWASP ZAP, IBM QRadar, OWASP Top 10, MITRE ATT&CK

Blockchain / Web3: Solidity, Hardhat, Hoodi, MetaMask

Methodologies: Agile, Scrum, SDLC, TDD, Clean Architecture, Code Review

Professional Experience

Full Stack Application Developer Intern

2024 – 2025

ApplyGoat — Remote (Germany)

- Built and scaled a job automation platform using Bubble (no-code) and custom integrations with Node.js, React.js, and MongoDB.
- Developed and shipped a browser extension from MVP to production, reaching 1,000+ active users with continuous iteration.
- Contributed to deployment pipelines and version management, improving system reliability and release cadence.

Freelance Software Developer

Jan 2022 – Present

Self-Employed — Remote

- Delivered 10+ production-grade applications across healthcare, e-commerce, and education using Java, Python, Node.js, Django, and .NET Clean Architecture microservices.
- Integrated Redis for session management, API response caching, and pub/sub event-driven patterns in distributed systems.
- Owned complete SDLC — requirements, architecture, development, testing, deployment, and post-launch support.

Security Engineering Intern

May 2025 – Nov 2025

HackerSchool — Bangalore

- Performed 15+ vulnerability assessments using Ghidra for binary reverse engineering alongside Nmap, Burp Suite, and Metasploit for network and web pentesting.
- Monitored security events with IBM QRadar for real-time intrusion detection and incident response.
- Authored technical incident reports with remediation roadmaps aligned to OWASP Top 10 and MITRE ATT&CK frameworks.

Data Science Intern

Apr 2024 – May 2024

SMEC Automation Pvt Ltd

- Developed predictive ML models using Python, Scikit-learn, and Pandas with full preprocessing pipelines.
- Benchmarked multiple algorithms to optimize model accuracy across train/test splits.

Technical Mentor — Application Development

2024 – 2025

FISAT, Angamaly

- Mentored 70+ students through workshops on MERN stack, REST APIs, microservices, SDLC, and deployment strategies.

Projects

AI Oral Cancer Detection & Biopsy Guidance System (Patent Filed)

GitHub

Python, PyTorch, Flask, React.js, Node.js, OpenCV, Raspberry Pi

- Designed Swin-UNet-based segmentation model for oral cancer detection; deployed on Raspberry Pi for low-cost rural screening.
- Undergoing real-world clinical validation in collaboration with Annoor Dental College under FISAT MoU.

.NET Clean Architecture Microservices Platform

GitHub

ASP.NET Core, .NET Clean Architecture, Redis, Docker, REST APIs, SQL Server

- Architected multi-service backend using Clean Architecture layers (Domain, Application, Infrastructure, Presentation) with Redis caching and pub/sub for inter-service communication.
- Containerised all services with Docker; Redis sessions reduced DB load 60% under load testing.

AI Mock Interview Platform

GitHub

Django, React.js, MongoDB, Redis, REST APIs — Microservices

- Built scalable interview platform (HR, technical, aptitude modules) on microservices architecture with Redis-backed session management.

Hangout — Real-Time Social Media Platform

GitHub

Node.js, Express.js, React.js, MongoDB, Socket.io, Redis, REST APIs

- Full-stack social platform with real-time chat, video calls, and Redis-powered offline notification queuing.
- Engineered WebSocket layer with Socket.io; designed RESTful APIs for user management, posts, and interactions.

Security Testing & Vulnerability Assessment Lab

GitHub Wiki

Ghidra, Burp Suite, OWASP ZAP, Nmap, Wireshark, Metasploit, IBM QRadar

- Reverse-engineered binaries with Ghidra and conducted full-scope pentests on authorised environments; documented injection, auth, and config vulnerabilities.
- Produced OWASP Top 10-aligned remediation reports for each assessment.

Car Rental System with AI Damage Detection

GitHub

Python, Django, MySQL, REST APIs, Hugging Face Models

- Enterprise rental platform with booking system, driver assignment, inventory management, and AI-based vehicle damage classification.

Education

Master of Computer Applications (MCA) — FISAT, Angamaly, Kerala	2023 – 2025
Bachelor of Computer Applications (BCA) — NSS College, Rajakumari, Kerala	2020 – 2023
PG Diploma in Blockchain Technology — IIITM-K, Trivandrum	2025 (In Progress)

Certifications

Certified Ethical Hacker (CEH v13) — EC-Council
MITRE ATT&CK v13 Foundations — AttackIQ Academy

Achievements

-
- **Patent Filed:** AI-driven oral cancer detection system; MoU established between FISAT and Annoor Dental College.
 - **Best Project Awards:** 1st Prize (BCA) and 2nd Prize (MCA) for innovative capstone projects demonstrating full SDLC execution.
 - **1st Prize — Scientia 2K25:** Technical paper presentation on AI-Driven Drug Discovery.
 - **Product Shipped:** Core developer of ApplyGoat browser extension with 1,000+ active users in production.
